The Stolle Family of Rifle Actions

ALUMINUM ACTIONS

The use of aluminum in rifle actions has been the ultimate goal of many people for a number of decades. First developed by Ralph W. Stolle in the late 60's and the early 70's, the Stolle line of actions emerged after many changes in design and techniques. The rigidity and light weight characteristics are highly desirable features, a must in today's competitive benchrest rifles. Made entirely of 7075-T651 aircraft aluminum and 4140 alloy steel, they insure the optimum in stiffness and durability.

The Panda action pictured here gives a good view of the steel insert used in the thread/locking lug area.

All aluminum models are of the square, flat-bottomed design to give a much greater and longer-lasting bedding area, which is desirable in precision rifles. Lightness in weight affords the use of heavier and stiffer barrels as well as aiding in balance. All models employ an integral full length 60° degree dovetail or Picatinny style rail on the top. Either rib style is available parallel to or tilted 0° 20' to the bore for long range use. This rib serves a dual purpose — added basic stiffness, plus built-in high precision scope mount bases.

OPTIONAL TG EJECTOR

The TG Ejector, developed in house by Tom Griffin, is a mechanical ejector that solves problems encountered in using spring based ejectors. This ejector requires an action designed specifically for its use.

STEEL ACTIONS

Kelbly's entry into steel action manufacture has led to the revival of the Grizzly name for the stainless or chrome moly Grizzly II centerfire action. The Atlas action was added in 2009 as a Remington semi-clone, and is available with or without a magazine. The actions have a 416R stainless steel body and a 4140 alloy steel bolt. They also use a trigger bracket that accepts Remington style triggers.
The Panda Action

The Panda action was the first of the aluminum actions designed by Ralph W. Stolle and to this day is still the most popular action built by Kelbly's Inc.

Most suited for the Light Varmint and Sporter classes in benchrest, it is also an excellent choice for a Heavy Varmint class rifle, for a barrel-clamped Unlimited rifle, and for a single shot live varmint rifle.

The Panda is available in either standard length or .850 inches longer with an integral recoil lug. Optional with the Panda is a micro port in right bolt/left full size or Shorty main port, left bolt/right full size or Shorty main port, right bolt/right Shorty main port or left bolt/left Shorty main port configurations. The Panda with a Shorty main port has a shorter bolt travel for faster shooting.

Made by Kelbly's In the USA
The Big Bore Panda Actions

**PROVEN ACCURACY**

The Big Bore Panda and Long Big Bore Panda actions are derivatives of the standard Panda action and are designed for those competitors who need to use either a dovetail or side plate mounted iron sight. The Big Bore Panda’s ribs are available in a narrower 60° dovetail or in a Picatinny style rail. The rib also can be parallel to the bore or with a 0° 20' tilt for long range use. The 60° dovetail has been narrowed to accept an Anschütz style iron sight. A side mount has been integrated into the design for a Redfield/Warner style sight as shown above.

Since these rifles usually use larger calibers than the standard benchrest rifles, an integrated recoil lug has also been added to increase the recoil area.

The F-Class Panda Actions

The F-Class Panda actions are a Panda variation designed for long range shooting. The dovetail or Picatinny rail is tilted 0°20' to compensate for bullet drop at greater distances. The F-Class Panda also includes an integral recoil lug to make it more suitable for use of larger calibers.

**STOLLE CENTER-FIRE ACTION CHAMBERING INSTRUCTIONS**

When chambering the barrel cut the tenon 1.0620" in diameter by 1.115" long for a Panda, Short Kodiak or Grizzly II, .980" long for a Long Big Bore Panda, Long F-Class, Long Kodiak or Long Grizzly II. 942" for a cone bolt Atlas, or .807" for a flat bolt Atlas. Leave rear end of barrel square for now.

Thread the tenon 1/16 inches in diameter by 18 threads per inch. If you are using the three-wire method to measure the threads the measurement should be 1.0715" plus .0000" or minus .0002" using 0.032" wires.

For a cone bolt run the chambering reamer in until the head-space gauge is flush with the rear of the barrel. For a flat bolt run the chambering reamer in until the measurement from the base of the head-space gauge to the shoulder of the barrel is 1.115".

For a cone bolt set the compound feed of the lathe to 30 degrees. Touch the tool to be used for cutting the cone at the chamber edge and lock the zeroed saddle stop against the saddle. Now back off the stop 0.135" and using the compound feed only cut the cone. This should give approximately 0.007" - 0.010" of space between the bolt and the barrel.

EXEMPLARY MOLD-IN COLORS

Molded-in coloring is available for all of the stocks, except the Panda Thumbhole, and is offered to help save on painting costs. Since stocks made in this way are basically finished on the exterior, they can have minor imperfections. These can include mold lines and structural cloth showing through the resin.

COLORS AVAILABLE

• Red • Green • White • Black • Blue
• Light Blue • Yellow • Orange • Gray
• Tan • Brown • Purple

These colors can be combined and/or have metal flake mixed in.

ROUGH-INS

Rough-ins are available for many action types. Not all rough-ins will work with every stock we make. The following lists most of what is available:

- Stolle Panda, Kodiak, Grizzly II; BAT (generic);
- Stiller Viper, Diamond Back; Nesika J;
- Farley; Turbo; Hall Rimfire; Remington 700, .40X, Winchester 52C, Anshutz
- 54 (BRFB only) and 1.375”, 1.430”, 1.500”, 1.600” generic rounds.

KELBLY BRFB and HCFB

The Kelbly BRFB and HCFB bench stocks have a flat bottomed rear end and are available in either left or right hand configuration. The BRFB stock is used with the Panda action and has a 3 inch wide flat fore-end for use in the bench rest varmint classes. The approximate weight is 1 lb. 8 oz. and the length is 31 1/2 inches. The HCFB bench stock is used with the Kodiak action and has a 2 1/4 inch wide flat fore-end for use in the bench rest hunter class. This is also a good combination off-hand and bench stock for varmint hunters. The approximate weight is 1 lb. 8 oz. and the length is 30 3/4 inches. When ordering either stock please specify left or right bolt and left or right port.

KELBLY GRAPHITE HUNTING

The Kelbly Hunting, a classic hunting style stock, is available in either hand. Rough-ins are available for the Stolle Kodiak, Stolle Grizzly II and 40X and 700 actions. When ordering please specify the action type being used and left or right bolt and left or right port. The approximate weight is 1 lb. 8 oz. and the length is 31 inches.

KELBLY GRAPHITE VARMINTER

The Kelbly Varminter has a beavertail fore-end and is available in right hand configuration only. Rough-ins are available for the Stolle Kodiak, Stolle Grizzly II and Remington 40X and 700 actions. When ordering please specify the action type being used with the stock. The approximate weight is 1 lb. 8 oz. and the length is 31 3/4 inches.

Kelbly 1M ADJUSTABLE

The Kelbly 1M is a new long range stock for 600, 1000 yd and F-Class competition. The stock has a 3 inch wide fore-end, a flat bottomed rear end and is available in either hand. When ordering please specify the action type being used and left or right bolt and left or right port. The standard approximate weight is 3 lb. and the length is 34 1/2 inches. Optional weights are 2 lb. 8 oz. to 18 lb.
PROVEN QUALITY

In 1999 Kelbly’s Inc. started production of fiberglass/graphite stocks. Reinforced with fiberglass and/or graphite, the stocks are manufactured using Six Enterprise center-rib technology. To minimize cutting into the graphite/fiberglass shell the stocks are fabricated with the trigger guard, bolt handle, port and bolt stop cut-outs already molded in for most stocks. All stocks can have more weight added upon request.

KELBLY KLUB

The Kelbly Klub bench stock is available in either left or right hand configuration. The stock has a 3 inch wide flat fore-end for use in the bench rest varmint classes and has a flat bottomed rear end. When ordering please specify the action type being used and left or right bolt and left or right port. The approximate weight is 1 lb. 8 oz. and the length is 32 ½ inches.

KELBLY 1M

The Kelbly 1M (shown in mold-in black with purple swirls) is a new long range stock for 600, 1000 yd and F-Class competition. The stock has a 3 inch wide fore-end, a flat bottomed rear end and is available in either hand. When ordering please specify the action type being used and left or right bolt and left or right port. The standard approximate weight is 3 lb. and the length is 34 ½ inches. Optional weights are 2 lb. 8 oz. to 18 lb.

SPG FB

The SPG FB stock is for use in the bench rest varmint classes for those who like to shoot “free-recoil” and is available in either hand. The lack of a pistol grip reduces the chance of “pulling” a shot. The stock has a 3 inch wide fore-end and a flat bottomed rear end. When ordering please specify the action type being used and left or right bolt and left or right port. The approximate weight is 1 lb. 8 oz. and the length is 33 ½ inches.

TMBR

The TMBR is a benchrest stock developed by Tom Meredith as his solution for a lower riding gun in the rest. The stock has a 3 inch wide fore-end, a flat bottomed rear end and is available in either hand. When ordering please specify the action type being used and left or right bolt and left or right port. The approximate weight is 1 lb. 8 oz. and the length is 32 ½ inches.

KLP

The KLP is for use in varmint classes for “free recoil” shooting and is available in right or left hand. The stock has a lower profile than the SPG FB with taller sides, 3/4” at primary bag-riding area. 33 3/4” length and weighs 1 lb. 10 oz.

Introducing the NEW Kelbly KTS

The Kelbly KTS stock is designed for Long Range Competition and Tactical shooting. The KTS stock is based off of our 1M stock. It is available in right or left handed models. We can install an adjustable cheek piece, a Graco 3-way butt pad, a butt hook, or a beaver tail front end (2.5” wide). The standard weight is 3lbs. without additional options, with all options installed the stock weight 3lbs. 12 oz. The overall length without a butt pad is 34 ½” inches and with the Graco butt pad installed the length is 36 ¼” to 37 ½” depending on how the butt pad is adjusted.

www.kelbly.com

330 683 4674
The standard Kodiak model is designed for the Hunter benchrest class. It is smaller in cross-section than the Panda and can contain a magazine port that will accept a small Remington 700 type of magazine or one of the newer extended length magazines.

The Long Kodiak was developed to allow extraction of a live 7mm Mag. or similar length cartridge. This action will accept a long Remington 700 magazine or one of the newer extended length magazines.

Both actions have an integral recoil lug and are available with or without a magazine. The actions with extended magazines are cut to accept AICS magazines. They make excellent actions for use in tactical and hunting rifles. If rounds are to be fed from the magazine, then a flat bolt is recommended for reliable feeding.

**KODIAK SPECIFICATIONS**
- **Weight:** 28.0 oz.
- **Bolt Faces:** 222, PPC, 308, Mag.(.532)
- **Head-space:** 1.115 in.
- **Length:** 8.500 in.
- **Bolt Head:** Coned, Flat
- **Width:** 1.400 in.
- **Bolt:** Left, Right
- **Height:** 1.595 in.
- **Port:** Left, Right, Double

**LONG KODIAK SPECIFICATIONS**

- **Bolt:** Left, Right
- **Height:** 1.595 in.
- **Port:** Left, Right, Double

**STANDARD WITH THE KODIAKS**
- Aluminum bolt plug
- Trigger bracket and screws
- Rear allen head guard screw
- Spiral fluted bolt
- Aluminum trigger guard
- Grease
The Atlas Action

The Atlas action is a Remington Semi-clone action, featuring a side bolt release and trigger hanger. This action can be easily fitted to any Remington 700/40x stock or chassis system with very little modification. The Atlas is made to extreme tolerances never heard of in a normal Remington action. The rear base is on a level plane with the front base, making it easier to have accurate alignment of optics.

Made of 416RS this action is very rugged and reliable. The bolt is made in house with 4140 alloy steel. We have designed the action to accept the AICS magazine boxes. We will accommodate the .223 and .222 rounds with a special magazine cut-out, please request if you intend to use one of these cartridges.

We use a 2-pin recoil lug on all Atlas actions, making a "bind" less likely to happen when changing barrels. Options for this action are single shot, magazine, fluted bolts, TG or Remington ejectors, and they are available in long or short action lengths.

**Scope Rings & Bases**

**Scope Rings**

Kelbly Scope Rings are made from 2024 aircraft aluminum, making them light, strong and tough. In the manufacturing process a 12 inch long bar is precision drilled and then placed on a mandrel, where several rings are machined at once on the bar. Two consecutive rings become a pair, which insures little variation in the pair. This eliminates the need to “lap in” the rings on well aligned bases.

* Big Bore Rings are for Big Bore Panda Actions only. They will not work on Anshutz Rifles.

WE NO LONGER MAKE COMBO SETS OF RINGS

All Rings Designated Sideplate Other Than Picatinny Rings are Rimfire and Kelbly Dovetail Capable.
**Bases**

Kelbly Scope Bases are made from 7075 aircraft aluminum and are for our stainless actions, Remington 700 actions and others.

The rings and bases are available in satin, anodized black semi-gloss and polished finishes.

One piece bases available for:
- Remington 700/40x short action/long action
- Thompson Center Arms Encore/Omega
- Ruger 10/22
- Savage Model 12
- Stolle Atlas Action Long/Short
- Stolle Grizzly Action Long/Short

Two piece bases available for:
- #1 - Bases- 1.370” Approx. to fit Small Hall, Wichita, and front ring of a Remington
- #2 - Bases- 1.740” Approx. to fit Hall B, and round sleeves of that diameter
- #3 - Bases- Flat Bottom to fit Flat topped sleeves, and Shilen DGA actions
- #4 - Bases- 1.500” Approx. to fit Medium Hall
- #5 - Bases- To fit rear bridge of a Remington 700 Short and Long Actions.

Remington Base- #1 and #5 bases for Remington Short and Long Actions.

CHAMBERING

Kelbly’s Inc. has a variety of top quality reamers for rebarreling Stolle and other manufacturers actions to your specifications.

Kelbly’s Inc. stocks Hart Rifle, Krieger, and Brux barrels in common calibers, twists, and tapers. We can special order those not in stock.

ADDITIONAL ITEMS

Kelbly’s Inc. also carries various shooting supplies. We stock Kelbly triggers, Jewell triggers, Lapua brass, VihtaVouri Oy rifle powder, Nielson "Pumpkin" Tools, Wilson Seating dies, neck dies, rear entry action wrenches, and barrel caps. We exclusively sell the March line of rifle scopes.

COMPLETE RIFLES

In addition to the bare actions, Kelbly’s Inc. also supplies complete rifles. Standard with each rifle - Stolle action, Kelbly scope rings, Kelbly fiberglass graphite stock, chambered barrel, Jewell trigger, aluminum butt-plate, glue-in bedding, and paint.

Available options are; pillar bedding, sling swivels, and removable weight systems. Other manufacturers’ stocks and barrels can also be substituted for the Kelbly stock or Hart or Krieger barrel at an additional cost.

ORDERING INFORMATION

When ordering actions, please specify type, right or left bolt, right or left port, and bolt face. All action orders must be in writing and accompanied by an FFL license and a $100 deposit.

When ordering complete rifles, please specify action type and configuration, caliber, neck dia., barrel make, type and twist, stock, paint scheme, rifle class and weight, and any additional options. All complete rifle orders must be in writing and accompanied by an FFL license and a $500 deposit. When ordering rings please specify type and width.

BEST ACTIONS FOR SHOOTING TYPE

Long Range (F-Class, Benchrest) — F-Class Panda and Long F-Class Panda Actions
Short Range Benchrest — Panda and Kodiak Actions
Tactical — Atlas and Kodiak Actions
Hunting — Atlas and Kodiak Actions
